Applicant has reviewed the Office Action mailed on July 30, 2001. Please amend the above-identified patent application as follows.

IN THE SPECIFICATION

Please make the paragraph substitutions indicated in the appendix entitled Clean Version of Amended Specification Paragraphs. The specific changes incorporated in the substitute paragraphs are shown in the following marked-up versions of the original paragraphs:

The paragraph beginning at page 8, line 3 is amended as follows:

Each memory subsystem 130 includes a C/A buffer register 131, a plurality M of memory devices 135 and a data buffer register 141. C/A buffer register 131 receives and latches the command and address information from C/A bus 110. As illustrated in Figure 1, buffer register 131 is connected between the command and address bus 110 and the plurality of memory devices 135.1 through 135.M. In one embodiment, memory system 100 has eight memory subsystems and eight memory devices 135 (i.e. N plus M equals [eight] sixteen). In another embodiment, memory devices 135 are dynamic random access memory devices (DRAMs). The number of memory devices 135 connected to each buffer register 131 may, however, differ from that shown in memory system 100 without departing from the spirit of the present invention.
